

CALL FOR PAPERS

INVITATION TO SPEAKERS

Welcome to submit your presentation proposals to the 14th edition of Embedded Conference Scandinavia (ECS), the event that attracts some 2,000 delegates and is considered the largest embedded conference in Europe. Last year the event consisted of some 60 sessions in seven parallel conference tracks, renowned speakers from 25 different countries and 90 exhibiting companies and organizations.

ECS poses a great opportunity for the audience to become updated on state-of-art, trends and key knowledge related to digitalization, Internet of Things (IoT), System-of-Systems (SoS), Cyber-Physical Systems (CPS) as well as Artificial Intelligence (AI) and machine learning. This year we aim for an even higher quality of the conference presentations and may limit the program to make sure that all sessions provide the very best value to the audience.

PROGRAM AND INTENDED AUDIENCE

ECS 2019 is a two-day event which offers several conference tracks with selected speakers covering important trends and key areas of embedded applications and technologies. In addition to the conference a substantial exhibition gathers a wide spectrum of companies in the embedded industry. ECS intends to attract people in all the following roles:

- Design, software and test engineers
- Hardware and software designers
- Project leaders
- System analysts
- Engineering managers
- Marketing and product managers

The ECS 2019 program will cover today's hot issues in the world of embedded systems, from components and operating systems to standard modules and system solutions, including low power processors, multicore and the new generation tools for faster and safer development. It will cover different usages of embedded systems captured by project case studies, open source as well as

important technical aspects. Examples of such aspects are quality and security in system and software development and testing, wireless communications and interoperability as well as various hardware designs and implementations.

PARTICIPATION

The conference is free of charge and open to anyone involved in the design, development, integration, marketing, use or support of embedded electronics, or related hardware, firmware or services.

EUROPE'S LARGEST EMBEDDED CONFERENCE

CALL FOR PAPERS

PRESENTATION FORMAT

We encourage the talks to be related to the latest technology, research programs together with users' experience and future requirements. Also, we welcome talks on emerging embedded technologies, systems and applications. The following types of presentations will be considered for the program:

- State-of-art offerings including background and based on clear problem descriptions. The layout for this type of presentation should follow a Situation – Problem – Solution structure, where products can come in as suggested solutions. Pure product presentations will not be accepted.
- Trends on embedded development and use that are of strategic importance and can help understanding what may come and how to relate to such developments. These presentations are expected to challenge mainstream thinking and preferably trigger discussion.
- Key knowledge deep dives on technologies, tools and methods that is valuable to keep updated on for practitioners. Proposals for this type may be for 30 minutes talks, 60 minutes tutorials or a contribution that can be included in any of these formats.

ABSTRACTS SUBMISSION

Please submit your proposal no later than June 3, 2019, via the abstracts submissions link at www.embeddedconference.se
> SPEAKERS > CALL FOR PAPERS.

THE PROPOSAL MUST INCLUDE THE FOLLOWING:

1. A headline
2. Type of presentation (state-of-art offerings, trends on embedded development and use, or key knowledge deep dives)
3. A brief abstract (150 words), addressing the format for the selected presentation type
4. A short biography of the presenter (150 words), focusing on current role, experience in the field and previous talks (if applicable).
5. Suggested length of presentation (30 or 60 minutes including Q&A)

CONTACT DETAILS

For further information regarding the conference and program, please contact Ulf Bodin, email conference.ecs@bramassor.se or telephone +46 (0)70 579 55 19. For general information regarding ECS and the exhibition, please contact Anna Weilemar, anna.weilemar@bramassor.se or +46 (0)739 581353.
