

TARGETED THERAPY IN B-CELL MALIGNANCIES

29-30 September, 2016

Chairpersons: Karin Ekström Smedby & Richard Rosenquist

JIM Journal of
Internal Medicine
Founded in 1863

Day I

9.30	Registration & coffee
10.15	Introduction & welcome <i>Karin Ekström Smedby</i> <i>Richard Rosenquist</i>

Session I – Introduction (Chair: Richard Rosenquist)

10.20-10.50	Epidemiology of B-cell lymphoma: bridging etiology, biology and outcome <i>Karin Ekström Smedby, Karolinska Institutet, Stockholm</i>
10.55-11.25	Ontogeny and evolution of B-cell malignancies: revelations from immunogenetics <i>Kostas Stamatopoulos, Center for Research and Technology Hellas, Thessaloniki</i>
11.30-12.15	Key-note lecture: Dysregulated pathways in diffuse large B-cell lymphoma <i>Riccardo Dalla-Favera, Columbia University, New York</i>
12.15-13.15	Lunch

Session II – Chronic lymphocytic leukemia (Chair: Anders Österborg)

13.15-13.45	The evolving molecular landscape of CLL: beyond the genome <i>Richard Rosenquist, Uppsala University</i>
13.50-14.20	Inside-out: the dual role of immunoglobulins in CLL <i>Paolo Ghia, Università Vita-Salute San Raffaele, Milano</i>
14.25-15.10	Key-note lecture: Targeted therapy in CLL <i>Michael Hallek, University of Köln</i>
15.10-15.40	Coffee

Session III – Mantle cell lymphoma (Chair: Eva Kimby)

15.40-16.10	Genomic landscape in indolent and aggressive mantle cell lymphoma: what do we know? <i>Silvia Bea, IDIBAPS, Barcelona</i>
16.15-16.45	Driving forces in relapsing mantle cell lymphoma <i>Birgitta Sander, Karolinska Institutet, Stockholm</i>
16.50-17.30	Targeted therapy in mantle cell lymphoma: current and future directions <i>Martin Dreyling, University Hospital Munich-Großhadern, Munich</i>
18.30	Dinner

Day II

Session IV – Follicular lymphoma (Chair: Qiang Pan-Hammarström)

9.00-9.30	Tracking early phases of lymphomagenesis <i>Bertrand Nadel, Université de la Méditerranée Marseille</i>
9.35-10.05	Unusual glycosylation of surface Ig allows follicular lymphoma cells to engage lectin drivers <i>Freda Stevenson, University of Southampton</i>
10.10-10.40	New treatment strategies for follicular lymphoma <i>Eva Kimby, Karolinska Institutet, Stockholm</i>
10.40-11.10	Coffee

Session V – Diffuse large B-cell lymphoma (Chair: Karin Ekström Smedby)

11.20-11.50	The complex genomic landscape of diffuse large B-cell lymphoma <i>Qiang Pan-Hammarström, Karolinska Institutet, Stockholm</i>
11.45-12.30	Key-note lecture: Targeting B-cell receptor signaling in diffuse large B-cell lymphoma <i>Louis Staudt, National Cancer Institute, Bethesda</i>
12.30-13.20	Lunch
13.20-13.50	Treatment of diffuse large B-cell lymphoma: gazing into the crystal ball <i>Mats Jerkeman, Lund University</i>

Session VI – Marginal zone lymphoma (Chair: Birgitta Sander)

13.55-14.25	Genetic panorama of marginal-zone lymphomas: unifying themes <i>Ming Du, University of Cambridge</i>
14.30-15.00	Microbes and lymphomagenesis: pathogenic and therapeutic implications <i>Maurilio Ponzoni, San Raffaele Scientific Institute Milan</i>
15.05-15.35	Therapeutic strategies in marginal zone lymphoma: state-of-the-art <i>Catherine Thieblemont, Hopital Saint-Louis, Paris</i>

Summary/Panel discussion

15.35-16.15	Unifying themes, unmet needs and future directions <i>Anders Österborg, Karolinska Institutet, Stockholm</i>
	Panel: Martin Dreyling, Paolo Ghia, Freda Stevenson, Michael Hallek Louis Staudt, Catherine Thieblemont, Riccardo Dalla-Favera
16.30	Meeting ends
