

Measures taken to reduce the spread of infection at the Swedish Optical Fair 2020

In order for our exhibitors and visitors to feel safe at the Swedish Optical Fair we will take a number of measures to reduce the spread of infection and secure the environment at the fair. These include:

- Reminding visitors to keep a distance in queues at the registration and in the café via signage and floor markings.
- Reminders about keeping a distance in the exhibition area via signage.
- Hand disinfection stations in the exhibition area.
- Extended cleaning of the general areas of the exhibition.
- Extended cleaning of toilets.
- Extra measures of cleaning of the products on the exhibition stands.
- 2 m distance between the tables in the exhibition café.
- The evening party has been cancelled.
- We ask that everyone showing any symptoms of illness refrains from attending the fair.

The Swedish Optical Fair has large areas with large stands and is relatively spacious for exhibitors and visitors. This permits us organizers together with our attendees to implement a secure and at the same time effective trade fair with good opportunities to see and show product news and do business.
