

## Safe to Visit

### Measures taken to reduce the spread of infection at ECS 2020

In order for our exhibitors and visitors to feel safe at Embedded Conference Scandinavia we will take a number of measures to reduce the spread of infection and secure the environment at the fair. These include:

- Reminding visitors to keep a distance in queues at the registration and in the café via signage and floor markings.
- Reminders about keeping a distance in the conference rooms and in the exhibition area via signage.
- Hand disinfection stations.
- Extended cleaning of the general areas of the exhibition.
- Extended cleaning of toilets.
- Extra measures of cleaning of the products on the exhibition stands.
- 2 m distance between the tables in the exhibition café.
- We ask that everyone showing any symptoms of illness refrains from attending the fair.

ECS has large areas and is relatively spacious for exhibitors and visitors. This permits us organizers together with our attendees to implement a secure and at the same time effective trade event with good opportunities to see and show product news and do business.
