

EMBO Workshop CD1/MR1-restricted T lymphocytes

We look forward to hosting the 12th International CD1-MR1 Meeting that will be held in Gothenburg, Sweden, May 22-26, 2022, at the Elite Park Avenue Hotel. The meeting will focus on the biology of T lymphocytes that are restricted by the non-conventional MHC class-I like molecules CD1 and MR1, such as natural killer T (NKT) cells and mucosal associated invariant T (MAIT) cells. The meeting will discuss the latest research developments, from basic biology of the T cells and the antigens they recognize, their development, activation and diverse functions in health and disease, and explore therapeutic strategies that target these cells. The field has seen a remarkable progress in the past few years, and we look forward to an exciting and stimulating meeting!

We hope to see you in Gothenburg in May 2022!

Susanna Cardell

Mikael Karlsson
